Minor Permit Revision
April 20, 2014**

**Red Cedar Gathering Company
Animas Compressor Station
Southern Ute Indian Reservation
La Plata County, Colorado**

Description of Permit Revision

On January 21, 2014, the Southern Ute Indian Tribe Air Quality Program (AQP) received a minor permit revision application from Red Cedar Gathering Company (Red Cedar) for the Animas Compressor Station (Animas) requesting to replace a 65.5 hp generator engine (emission unit G-101) with a 157 hp generator engine (emission unit G-201). The replacement engine has the same regulatory requirements of 40 CFR 63, Subpart ZZZZ as the engine it replaced, but did not meet the criteria for an off-permit change under permit condition III.C., because it is a different make, model, and horsepower. Therefore, the change was required to be processed according to the minor permit revision requirements of RAC 2-111(3). No other regulatory requirements were triggered by the engine replacement and the change did not violate any existing permit terms or conditions.

While the permit was open, AQP also addressed a needed update regarding the engine serial number and installation date for emission unit C-201 due to an off-permit change engine replacement in August 2014 for emission unit C-201. Red Cedar made this change under the Alternative Operating Scenario Engine Replacement permit conditions of III.C and the Off-Permit change requirements of condition IV.O.

Specifically, the following revisions have been made to this permit:

Section I.B. - Source Emission Points

- Updated Table 1 to include replacement generator engine (G-201) description and remove previous generator (G-101) description
- Updated the serial number and installation date for compressor engine C-201 to reflect an off-permit change notification received on August 27, 2014

Section II. - Site Specific Requirements

- Replaced emission unit identifier Unit G-101 with Unit G-201

AQP is making these revisions as a minor permit revision in accordance with RAC 2-111(3). The permit will be reissued as permit number V-SUIT-0035-2013.02.

For specific applicability information regarding the Part 70 permit for this facility, please reference the Statement of Basis for permit number V-SUIT-0035-2013.00.
